

# Knowledge for Development

Leveraging Knowledge Management (KM) to support the implementation of the Global Biodiversity Framework's (GBF) Goals and Targets and the Sustainable Development Goals (SDG)

**Prof. Dr. Andreas Brandner**

Webinar, 5 September 2023

# Content

- Knowledge is at the heart of sustainable development
- KM for Biodiversity Initiative and Challenge 2023
- Implementation timetable
- National Knowledge Management Strategies

Overview

# **KNOWLEDGE IS AT THE HEART OF SUSTAINABLE DEVELOPMENT**

# Knowledge for Development

- **Knowledge** is an essential resource and an indispensable prerequisite for the development of societies all over the world.
- **SDG17** calls for partnerships for knowledge sharing and collaboration. KM is a key enabler.
- The **Knowledge for Development Partnership** is an international multi-stakeholder partnership to advance knowledge for development. It connects more than 2000 partners including senior KM experts from all SDG areas incl. water and sanitation, agriculture, biodiversity, and many more

### Vandana Gopikumar

Co-founder, The Banyan and The Banyan Academy of Learning Health (BALM) and Professor, School of Social Work of Social Sciences (TISS), India

Mental health is everybody's business. The interactive structural barriers such as class, caste/ race / ethnicity based discrimination and consequent lost opportunities being has now been established. While brain chemistry markers are important in addressing mental health, it is no longer the medical model of mental illness that is embraced. The future of positive mental health may be social context dependent. Therefore, concepts of mental health today and certainly the ideal of mental health are the effects of exclusion, alienation

### Elizabeth Friend

Capacity Building Resource Exchange - CAPRESE, Switzerland

From an early age, I had great respect for the carving on the Temple of Apollo at Delphi: γνῶθι σεαυτον. As a scholar of Classical Greek, I appreciated Socrates' insistence that none of us know anything and that wisdom comes from being aware that our so-called 'knowledge' is frequently developed without any rational process. The subjectivity of the epistemological process was not called into question, simply the rationale. You later learned that

### Robert Chambers

Professor, Institute of Development Studies, University of Sussex, UK

The answer to the rhetorical question 'Can We Know Better?' is 'Yes we can'. The history of humankind and of development is spectacularly littered with error. We desperately need to be less wrong, more realistic and more in touch and up to date with ground realities and accelerating change. The priorities for what we need to know and how we struggle to know it themselves change and are changing ever faster. The urgency of transforming our approaches and methods for knowing has been made more acute by the virus of fake news, malicious invasions of personal privacy and covert digital manipulations for political purposes. More than ever we need multitudes of world citizens who share a passion for truth, respect for the views and knowledges of others, and a nimble and eclectic methodological pluralism in approaches and methods.

### Annabella Busawule Johnson

Consulting and managing partner, Austria

To serve effectively across an international community of knowledge for development partners, we must have first and foremost people, knowledge and technology while, of course, not taking for granted the peace and security and conducive social entrepreneurial environment, effective policies, and partnerships on both local, national and international levels. I want to

### Rabih El-Haddad

Multilateral Diplomacy Programme, United Nations Institute for Training and Research (UNITAR)

As the training arm of the United Nations System, UNITAR is committed to equipping individuals, institutions and organizations with the knowledge skills needed to meet the Sustainable Development Goals (SDGs) and overcome global challenges of the 21st Century. UNITAR provides training and capacity development activities to assist mainly developing countries with special attention to Least Developed Countries (LDCs), Small Island Developing States (SIDS), countries from the Group of 77, and other groups and communities who are most vulnerable, including those in conflict situations. In order to do so, we leverage partnerships with a range of knowledge organizations and research-related

bodies to stay abreast of the latest developments in andragogy and ensure that no one is left behind. To meet the goals, we will capitalize on UNITAR's expertise in the design and delivery of high-quality

### Hyrum W. Smith

Senior Lecturer in Health Policy, Planning and Management, University, Uganda

According to Hyrum W. Smith, wisdom is knowledge applied. In order to promote knowledge uptake in a changing world, the coming decade should be seen to sanctify of what has been, in many instances, lauded hierarchy of evidence. I absolutely concur that evidence enable one to appreciate the complex array of evidence by a variety of research methods, gauge the trustworthiness can be placed in the recommendations and, in some instances, alert the practitioner when caution is required. Many will

# The Agenda Knowledge for Development

see [www.k4dp.org/agenda](http://www.k4dp.org/agenda)

The KDGs are a key element and based on the statements of the 150+ authors.

- E Goal 1: Pluralistic, diverse and inclusive knowledge societies
- E Goal 2: People-focused knowledge societies
- E Goal 3: Strengthening local knowledge ecosystems
- E Goal 4: Knowledge partnerships
- E Goal 5: Knowledge cities and rural-urban linkages
- E Goal 6: Advanced knowledge strategies in public and development organisations
- E Goal 7: Capture, preservation and democratisation of knowledge
- E Goal 8: Fair and dynamic knowledge markets
- E Goal 9: Safety, security, sustainability
- E Goal 10: Legal knowledge
- E Goal 11: Improved knowledge management competences
- E Goal 12: Institutions of higher education to play an active role
- E Goal 13: Information and communication technologies for all
- E Goal 14: The arts and culture are central to knowledge societies

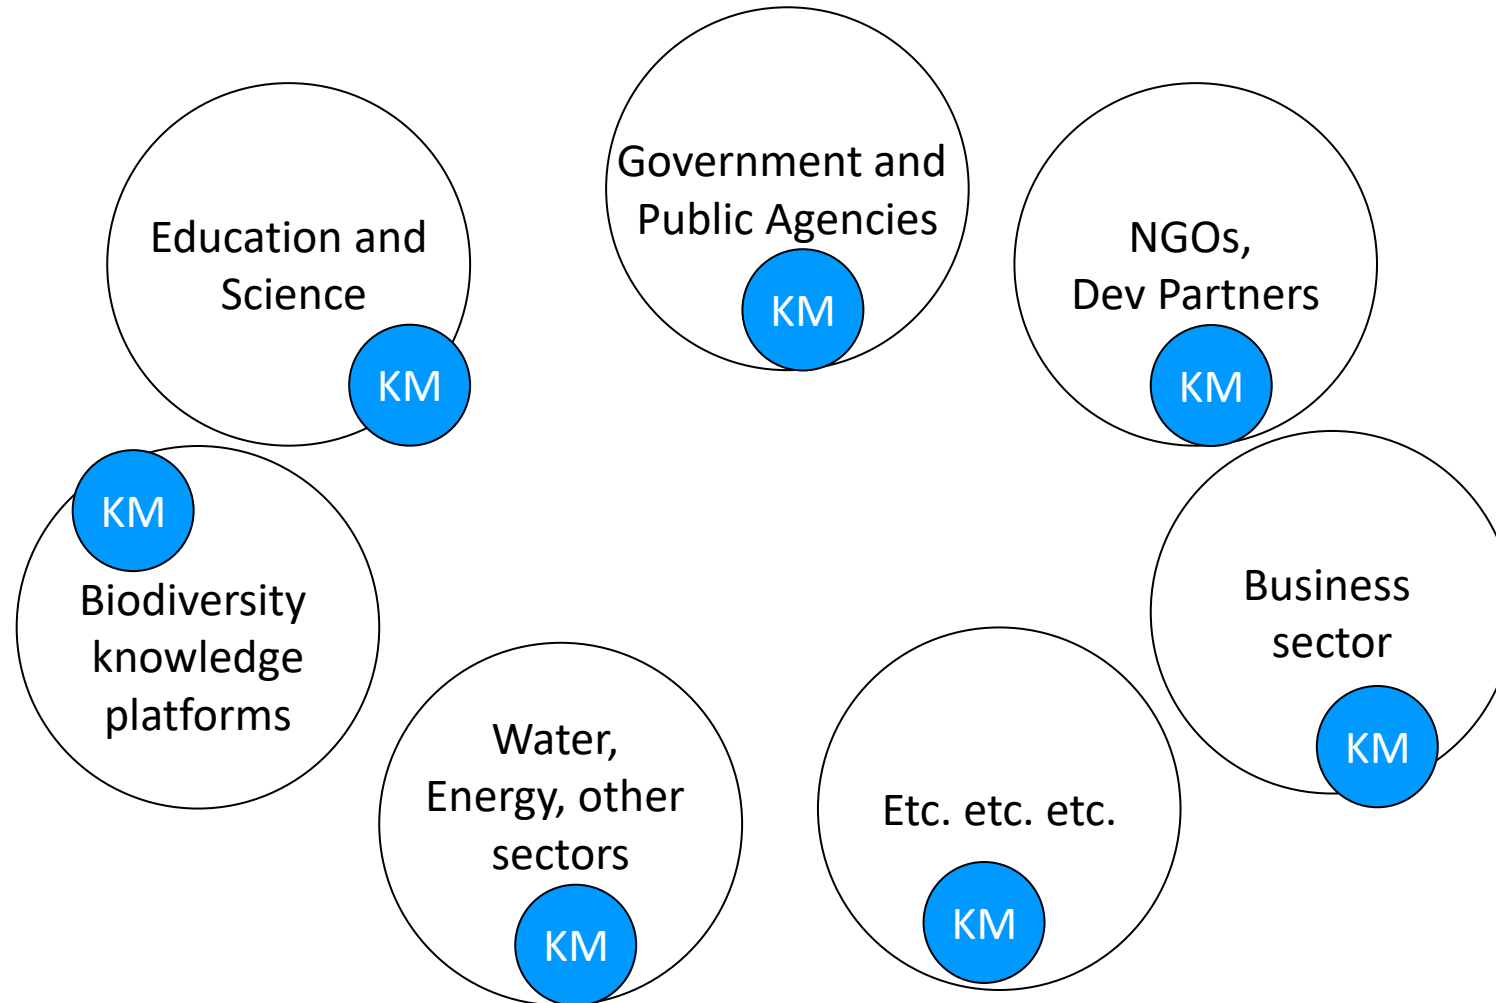

# Activities of K4DP

-> [www.k4dp.org](http://www.k4dp.org)

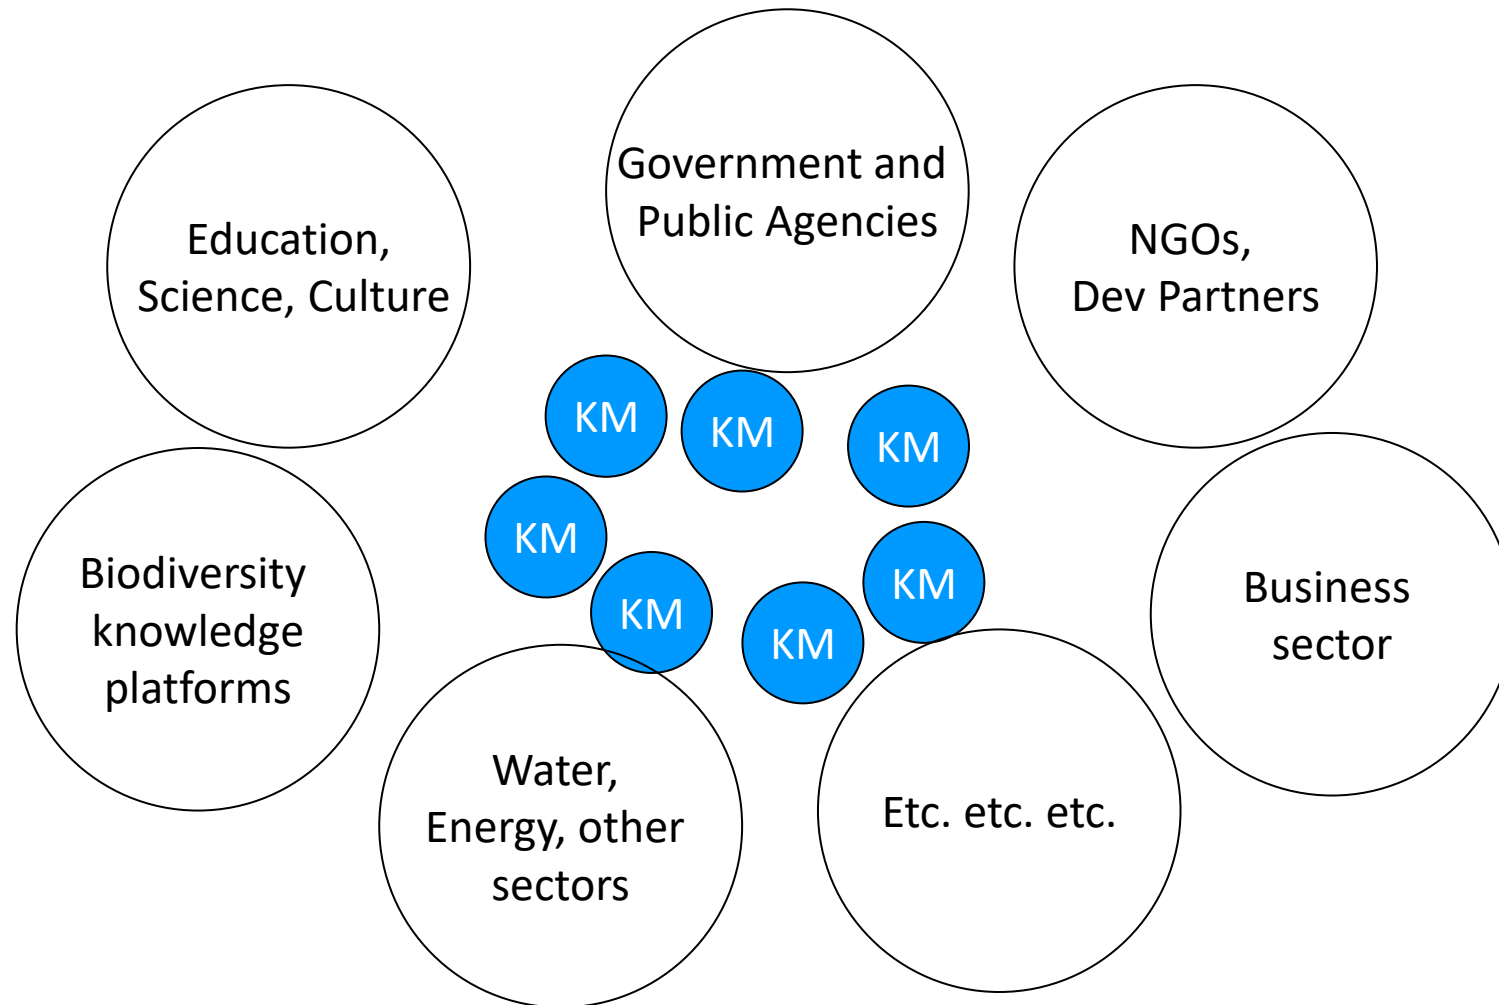

- Supporting countries to develop a **National Knowledge Agenda**
- Facilitating national and sectoral **Knowledge Partnerships and Challenges**
- Advancing **Knowledge Management** in public and private organisations
- **Fighting knowledge divide**
- Helping to build **powerful knowledge hubs in sectors**
- Providing **evidence on knowledge ecosystem**
- Strengthening **knowledge dissemination** and communication
- Strengthening **academic education and research in Knowledge Management**
- Fostering international cooperation for **investment in knowledge**

# Knowledge is scattered across stakeholders and sectors

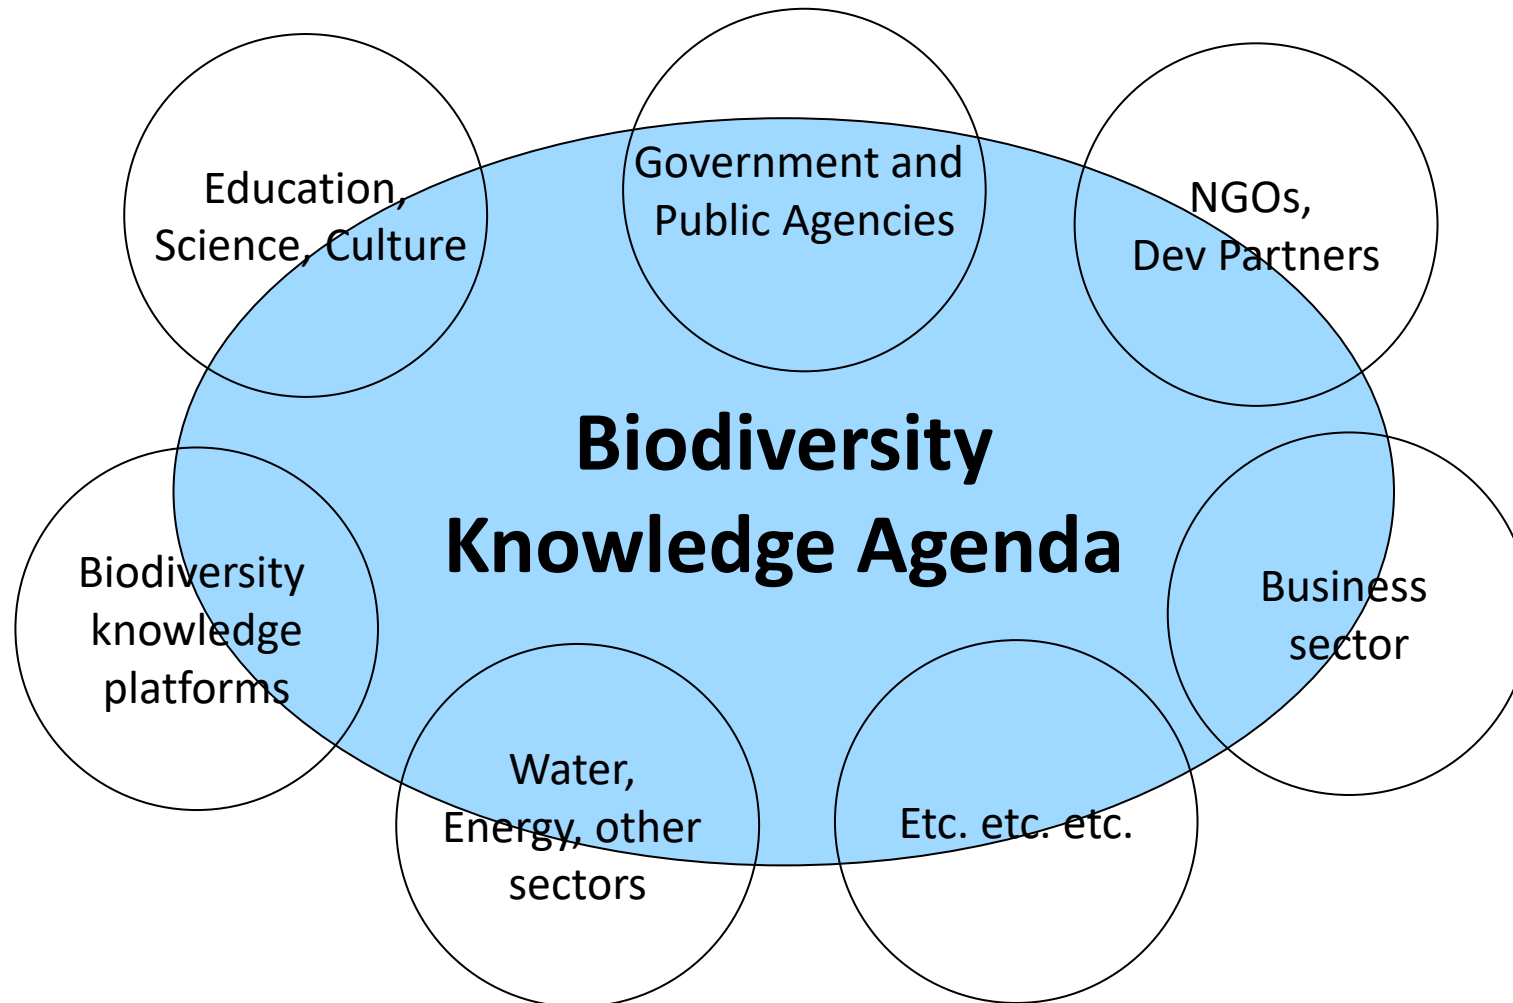

# Let's join forces...

# ... to create an Biodiversity Knowledge Agenda!

# Data/information is not knowledge

# One definition of knowledge

- Knowledge is the living body of all experiences, learnings, information, and other knowledge resources that are consciously and unconsciously bundled in daily life to create one's future.
- As such, knowledge is a living process built on knowledge resources, but also on the capacity of bundling these knowledge resources to take action for a better future.

# Implicit/Tacit vs Explicit Knowledge

## Implicit/tacit Knowledge

- subjective, personal
- experience
- valid only here and now
- related to specific context
- practise

## Explicit Knowledge

- objective
- rational
- generic
- does not depend on a context
- theory

*Implicit/Tacit Knowledge*

*Explicit Knowledge*

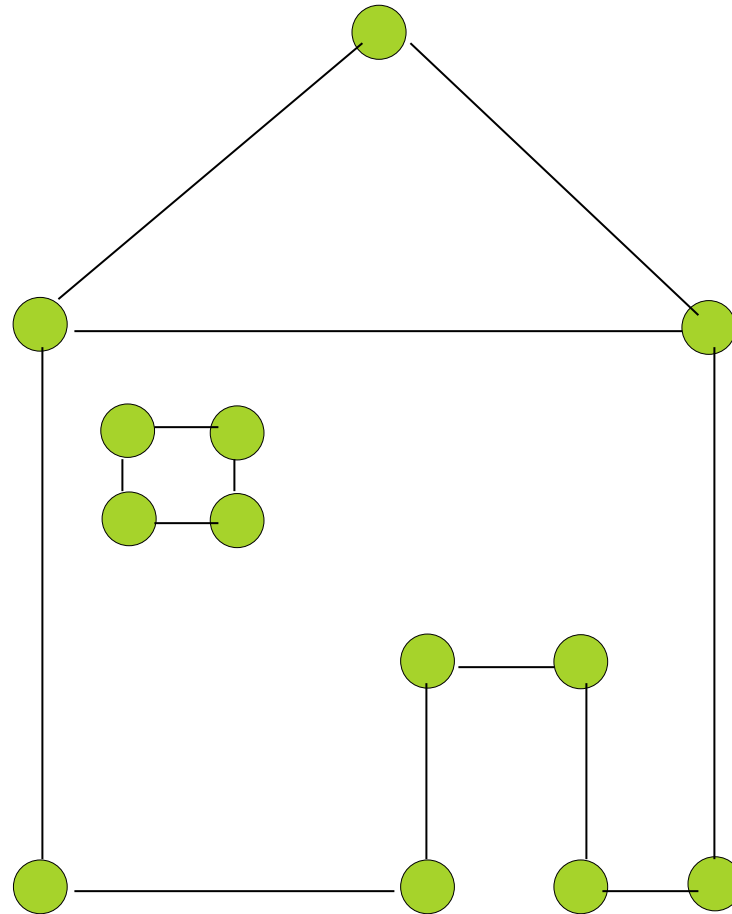

# Three categories of knowledge

**Knowledge is ..**

- **Human knowledge**  
leaving the organization every evening
- **Codified knowledge**  
remaining in the company when people leave
- **External knowledge**  
staying outside but being relevant to operations

# What can you see?

# Knowledge Management: Our definition

## **Knowledge Management is**

- a targeted, integrated, and systematic approach
- to identifying, acquiring, creating, sharing, applying, and capturing knowledge,
- relevant to achieving the specific objectives of the organization.

# Targeted, systematic, integrated Knowledge Management

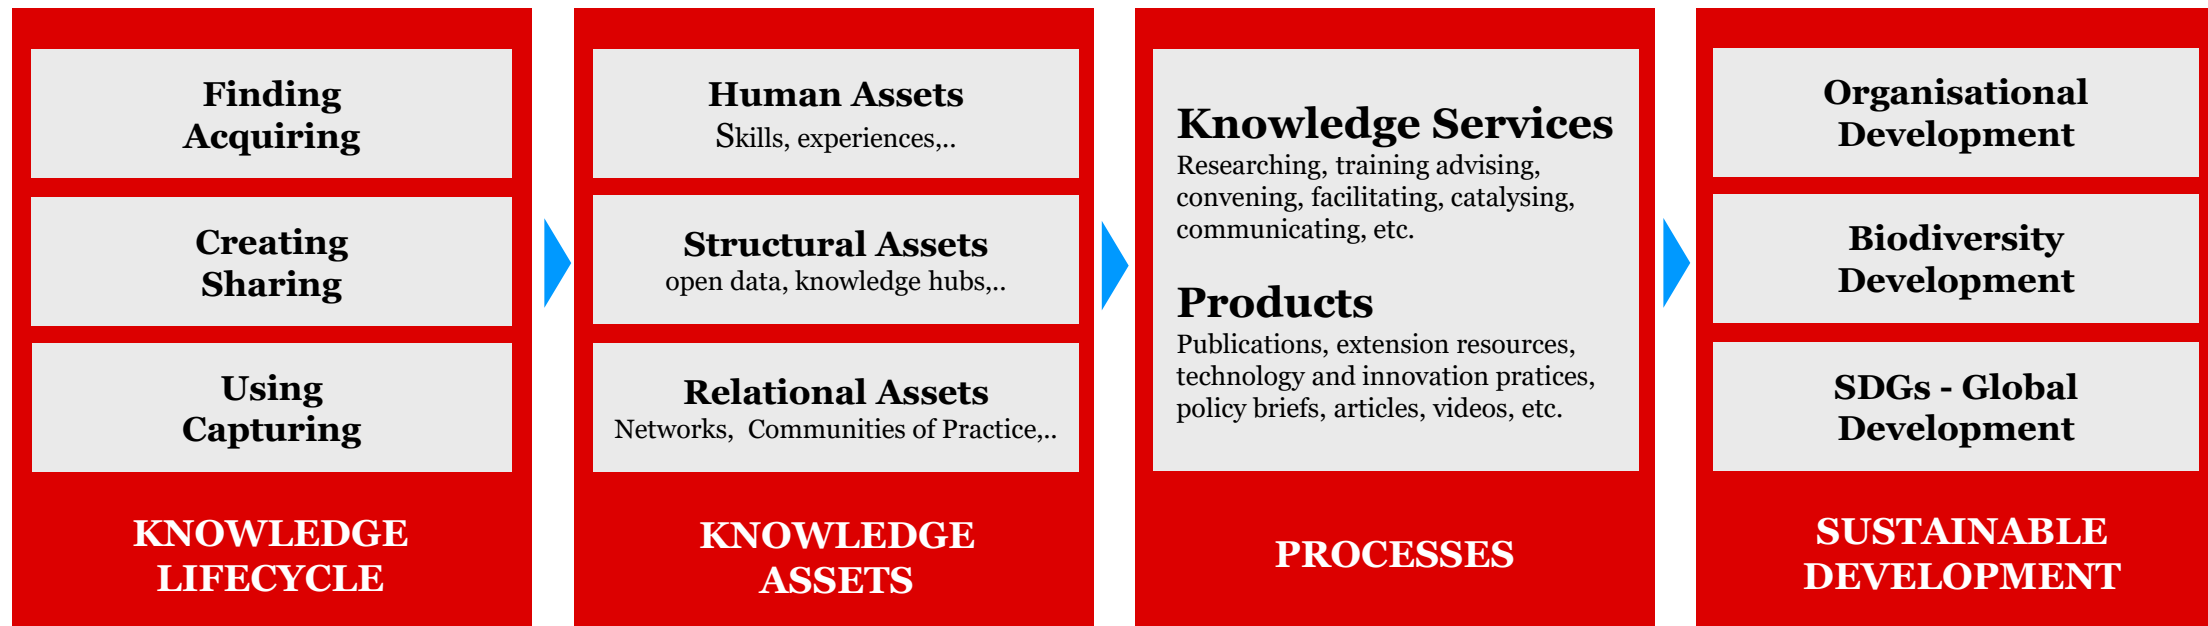

Based on Probst, Raub, Romhardt, Managing Knowledge, 1999

Strategic, targeted, integrated approach to KM:

# Biodiversity KM Framework

## Knowledge Leadership and Governance

## Monitoring and Learning

Overview

# **KNOWLEDGE MANAGEMENT FOR BIODIVERSITY CHALLENGE 2023+**

# Levels of responsibilities

- Knowledge Ecosystems require responsible action on all societal levels with managed linkages between the levels.

# KM4B Challenge: The motivation

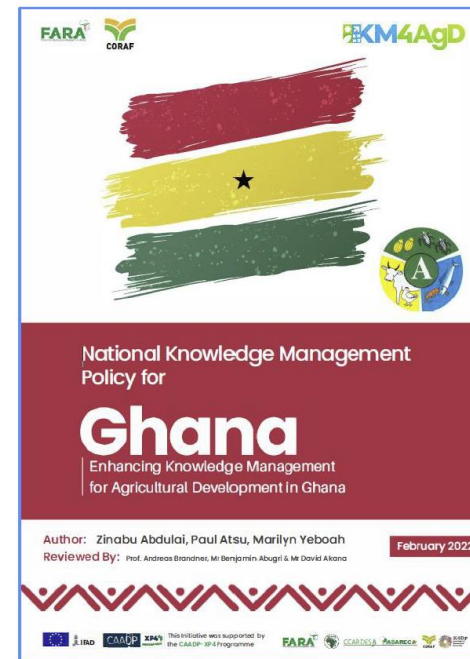

- **Knowledge needs to be managed** professionally across organisations to create vital and performative **knowledge ecosystems**.
- **Qualified Knowledge Managers** are needed in all sectors and at all levels, and they profit from joint learning and experience sharing.
- Due to the complexity and distribution of knowledge in the biodiversity they **need to master the KM Challenges together**.
- Solutions shall be **developed and implemented in partnership** based on an integrated KM approach.
- The **KM Challenge has been successfully implemented** in the agricultural sector in cooperation with FARA and all relevant continental partners in 2021 and 2022 – KM4AgD Challenge. See a here: [video](#)

# Sample outputs of the KM4AgD Challenge 2021/2022

**Organisational KM Strategies**

**National Knowledge Policy Briefs**

**Thematic K-Policy Briefs**

# Knowledge Agenda for Agricultural Development – a great reference for Biodiversity

**Knowledge Trees, by Inga Yashina 2021**

**Art is part of  
the programme  
fostering  
wisdom**

# KM4B Challenge 2023+

- A **joint programme** of the CBD and the Knowledge for Development Partnership
- **National focal points of all CBD Parties to join the KM4B Challenge 2023**
- **Faculty with 20+ TOP KM experts** with specialisations in Biodiversity
- **20 training sessions** of 1,5 hours and **online learning material** on **organisational** and **sectoral Knowledge Management** with strong interaction and peer collaboration.
- Participants are guided to
  - develop their own organisational **Knowledge Management Strategies**
  - co-create sectoral/national **Knowledge Policy Briefs**
  - jointly develop the **Biodiversity Knowledge Agenda**
- Participants shall be awarded “**Certified Knowledge Managers for Sustainable Development**”
- Solutions and findings are presented at regional **conferences**
- **Biodiversity KM CoP launched**

Overview

**NATIONAL**

**KNOWLEDGE MANAGEMENT**

# Agenda Knowledge for Uganda

## Happy knowledgeable citizens

- Diversity and pluralism
- Quality education for all, key knowledge skills
- Empowered youth and generation partnership
- Knowledge inclusion
- Knowledge communication
- Access to ICT
- Knowledge work and entrepreneurship

## Knowledge-driven collaborative organizations

- Knowledge-service providers public/private
- Knowledge, learning, innovation Management
- Digitalization
- Knowledge acquisition
- Investment in knowledge services and technology
- Knowledge export and knowledge tourism
- Stronger linkage of companies with schools and academic institutions

## Sustainable knowledge society

- Ugandan knowledge identity and heritage
- K-strategies and k-partnerships in sectors
- Diaspora knowledge and knowledge of immigrants
- International knowledge networks and leadership
- Open knowledge, smart public services
- K-cites and k-spaces
- Religion, art, and culture
